Configuration settings

Configuration	Description
Log off after (x) Minutes inactive	The software will automatically log off the user after (x) amount of minutes of inactivity with a max of 600 minutes.
Log out on completion	The software will automatically log off the user after completion of an action.
Reset password	The password reset button can be used to reset the password. This is not required when creating a new user account.

After the correct rights are selected and the configuration settings are completed for the new user, Please click "Ok".

The password for the new user will appear.

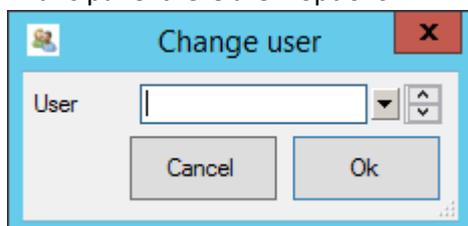

NOTE: The password will appear only once, so please write down the password.

Password reset

To reset the password for a user please login as “manager”.

Go to **Manager tools > Change existing user**.

In this panel there are 2 options.

1. Type in the username and click “**Ok**”
2. Click on the small arrow next to the textbox. A list of all users will appear and select the user you want to edit.

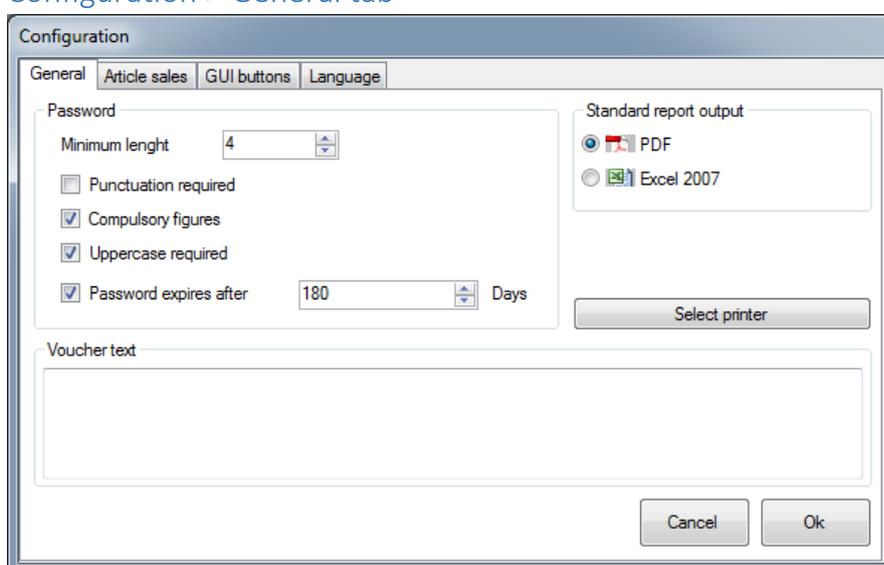

Click “**Ok**” and select the **Reset password** button in the next screen. Please write down the password before closing the password screen.

Configure your application

To get to the EVA Client configuration screen, please login as “manager”.

Go to **Manager tools > Configuration**.

Configuration > General tab

Password

Options	Description
Minimum length	This will set a mandatory minimum required length.
Punctuation required	This will set a mandatory non-numeric and a non-alphabetic character. <i>Example characters: () - : & ! @ ? ;</i>
